

Microsoft Excel application builds a program to evaluate the production and business performance of Hung Linh Technical Consulting Company Limited.

Tran Minh Quang

Abstract: This topic aims to improve business management performance by applying Microsoft Excel to analyze and evaluate the production and business efficiency of Hung Linh Technical Consulting Company Limited. The practical context indicates that the lack of a necessary performance evaluation system is reducing the company's operational efficiency. Through theoretical research combined with experimentation, the topic develops a program to optimize the business management process. The expected results will provide the company with accurate and timely decision-making information regarding the current status of its production and business activities, thereby improving overall performance and enhancing competitiveness.
