

Current situation and solutions to improve efficiency in death registration management at Chieng Hoa Commune People's Committee - Muong La District - Son La Province

Lo Van Tham

Abstract: The topic aims to identify the current status of death registration management at the People's Committee of Chieng Hoa Commune, in order to propose solutions to improve efficiency. Through theoretical and practical research, the goal is to build an automated management system to enhance service quality. The method combines data analysis and impact assessment from measures implementing information technology applications. Expected results will contribute to modernizing the civil registration management process, meeting the needs of the people while effectively supporting state management activities.

Keywords: Civil registration management, Information technology, Chieng Hoa Commune People's Committee, Effectiveness of management work, Death registration
