

Building a modern office model under the one-stop-shop mechanism at La Bang Commune People's Committee, Dai Tu District - Thai Nguyen Province

Giap Thi Chinh

Abstract: This topic focuses on researching and building a modern office model applying the one-stop-shop mechanism at the La Bang Commune People's Committee, aiming to improve the efficiency of public administration management. Through the process of analyzing the current situation and related factors, the topic will apply a combined method of theory and experimentation to determine optimal solutions. The expected result is that building a one-stop-shop office model can enhance work productivity and the quality of administrative services, contributing to the sustainable development of La Bang Commune.

Keywords: office model, one-stop mechanism, improving management efficiency, Commune People's Committee
