

Excel application to improve the efficiency of birth certificate registration management at Ky Phu Commune People's Committee - Dai Tu District - Thai Nguyen Province

Nguyen Thi Tra My

Abstract: In the context of birth certificate registration management still facing many limitations, this topic aims to build an electronic management system using Excel to improve work efficiency. Through theoretical research and experimental implementation, the project hopes to create a powerful support solution for local administrative agencies. The expected results will have high applicability, contributing to enhancing the management capacity and public services of Ky Phu Commune People's Committee.
