

Recruitment management application at Moaeng company - Dinh Tram Industrial Park - Hoang Ninh Commune - Viet Yen District - Bac Giang Province

Giap Thi An

Abstract: In the context of an increasingly competitive labor market, this topic aims to research and implement a recruitment management system at Moaeng Company. The project's objective is to optimize the recruitment process to meet the demand for high-quality human resources. The research methodology includes analyzing the current situation, building a model, and piloting the management system. The expected result is to improve recruitment performance while enhancing the company's competitiveness.
