

# **Building a website guide on some methods to prevent viruses**

**Lê Văn Trinh**

**Abstract:** This topic aims to build a website that provides guidance on modern methods for combating viruses, meeting the need for updated and useful information for individuals and organizations. Through theoretical research and practical implementation, we will provide effective and easy-to-apply technical solutions. The project not only offers in-depth knowledge on virus prevention and control but also contributes to the development of information technology in the field of cybersecurity.

**Keywords:** Guide website, Antivirus methods, Cybersecurity, Information technology, Virus control
