

Research on the operation and maintenance process of the Rheortest cerebral blood flow machine

Bui Van Hiep

Abstract: This topic aims to study and evaluate the effectiveness of the operation and maintenance process of the Rheortest cerebral blood flow machine in medical practice. By combining theoretical methods with experimentation, the topic focuses on optimizing the device's operation process to ensure safety and performance. The expected results of this study are to provide useful solutions for medical units in improving the quality of brain healthcare services.

Keywords: Cerebral blood flow machine, Rheortest, operating procedure, maintenance, optimization
