

Research on the operation and maintenance process of the BTS350 biochemical analyzer

Ngo Thi Hoa

Abstract: This topic focuses on researching the operation and maintenance process of the BTS350 biochemical analyzer, aiming to meet the requirements for improving quality control and ensuring safety during the analysis process. By combining both theoretical research and experimentation, the topic will provide optimal solutions for healthcare organizations to enhance the operational performance of the equipment. The expected results will contribute significantly to improving the efficiency and reliability of the biochemical testing system in Vietnam.

Keywords: Biochemical testing, BTS350, Equipment maintenance, Practical research, Quality control
