

Study of the operation, maintenance, and troubleshooting procedures for the Fujinon EPX-2500 gastroscope.

Vu Thi Luong

Abstract: This topic aims to solve the problem of improving usage efficiency and extending the lifespan of the Fujinon EPX-2500 gastroscope by analyzing current operation and maintenance procedures and proposing troubleshooting methods. Through theoretical research combined with experimentation, we aim to provide a comprehensive solution for operators and technicians to improve medical service quality and minimize equipment downtime.
