

Research on the operation, maintenance, and troubleshooting procedures of the BSM-3562 patient monitor by NIHON KOHDEN.

Luong Duc Tuy

Abstract: This topic aims to study the operation, maintenance, and troubleshooting procedures for the BSM-3562 patient monitor manufactured by NIHON KOHDEN. Through practical analysis at medical units, the topic identifies common issues encountered during the use of this device to find solutions for optimizing operational performance and improving the quality of patient care services. The research methodology includes both theoretical and experimental approaches to ensure the accuracy of information. The expected results will bring significant benefits to the healthcare industry, helping to improve patient experience while minimizing equipment operating costs.
