

Building personal financial management software for officials, employees, and workers of Hong Hai Foxconn Technology Group.

Le Tuan Anh

Abstract: In the current context, personal financial management is becoming an important issue for individuals in the Hong Hai Foxconn Technology Group. This project aims to develop personal financial management software to support managers, employees, and workers in planning and tracking their financial expenditures. Through a combination of theoretical research and experimentation, the project is expected to provide effective technical solutions, contributing to improving the quality of life for workers. The results of the project are anticipated to make significant contributions to the field of personal financial management within the enterprise.
