

Building a grocery sales website to serve officials, employees, and workers of Hong Hai Science and Technology Corporation.

Nguyen Dinh Hau

Abstract: In the context of increasing demand for online shopping, this topic aims to research and build an e-commerce website system specializing in grocery items. The main objective is to provide a convenient and efficient solution for the staff, employees, and workers of the Hong Hai Science and Technology Corporation to purchase necessary products within the enterprise. Through a combination of theoretical research and experimentation, this topic will propose optimal technical solutions for the website, including a user-friendly interface, an easy-to-manage administration system, and the ability to integrate with modern payment services. The expected outcome of the topic is to provide a solid digital platform to promote the corporation's internal business activities and improve the quality of life for its employees.

Keywords: E-commerce website, grocery items, internal administration, online payment
