

# **Testing the website of the Hyundai Thanh Cong electronic portal.**

**Nguyen Thi Thu Hoai**

**Abstract:** This topic focuses on evaluating the quality of the web portal system owned by Hyundai Thanh Cong. The context proposes the necessary requirement for website testing in the rapidly developing digital technology environment. The objective of the research is to build an effective testing process and propose solutions to improve the quality of electronic information services for the enterprise. The method combines experimentation and theoretical analysis to evaluate the functionality, performance, and security of the website. The expected results will contribute to enhancing user experience and optimizing content management on the web platform.

**Keywords:** Website Testing, Electronic Portal, Hyundai Thanh Cong, Testing Process, Service Quality
