

Build a phone sales website for Giang Sơn store.

Phan Văn Long

Abstract: This project aims to design and deploy a professional website system to serve the mobile phone business of Giang Sơn store. The context for choosing this topic is based on the need to realize an online sales channel, meet inventory management requirements, and enhance product marketing effectiveness. Through theoretical research and the application of modern web development techniques, the system will provide a comprehensive solution including shopping, order management, and online payment functions. The significance of the topic is not only reflected in improving business processes but also contributes to the trend of digitizing e-commerce activities in Vietnam.

Keywords: Retail website, E-commerce, Web development, Mobile business, Warehouse management
