

Building a table reservation application for the Japanese restaurant ToKyo in Thai Nguyen.

Pham Thi Hong Nhung

Abstract: This topic aims to research and develop an online table reservation system for the ToKyo Japanese restaurant in Thai Nguyen, meeting the need for fast and efficient customer service. Through a process of practical surveys and user requirement analysis, the topic uses a combination of theoretical research and experimentation to build a convenient reservation interface. The expected outcome of the project is to improve the restaurant's service experience while enhancing the work productivity of service staff.

Keywords: Table booking application, ToKyo Japanese restaurant, Thai Nguyen, user requirement analysis, intuitive interface
