

Building an online Chinese learning website

Truong Quang Viet

Abstract: In the context of the increasingly developing digitalization of education, this topic focuses on building an online Chinese language learning website to meet the flexible learning needs of users. The goal is to create a multimedia learning system with standardized content and high interactivity. The research method involves combining linguistic theory with website construction experiments, using HTML5, CSS3, and JavaScript technologies to develop a user-friendly and effective interface. The topic is expected to provide a valuable learning tool for the global community of scholars and Chinese learners, contributing to improving education quality and enhancing cultural exchange between countries.

Keywords: Chinese learning website, HTML5, user interface, multimedia learning system, digital technology in education
