

Building an online learning website for the Viet My language center.

Chu Van Vu

Abstract: In the context of the increasingly developing digitalization of education, this topic focuses on building an online learning website system to support the Viet-My English Center in improving teaching effectiveness and reaching remote learners. The objective of the research is to design and deploy a digital platform integrating learning tools, student management, and foreign language proficiency assessment. The research methodology includes needs assessment, functional requirements analysis, and system development following a hybrid approach of theory and experimentation. The expected results will significantly contribute to improving the teaching model at the center and expanding learning opportunities for the community.
