

Building a social network for the "Tutor – Student" community.

Ngo Quang Chien

Abstract: This topic aims to address the issue of communication and information exchange between tutors and students in the current digital context. The goal is to build a specialized social network platform for connecting, sharing experiences, and providing mutual support between the two parties. The research method is based on integrating social network theory with experimentation using modern technologies. It is expected that the topic will make a significant contribution to the development of the education sector by promoting effective communication within the learning community.

Keywords: social network, digital education, tutor, student, experience exchange
