

Building a movie ticket booking website for Blaze Cinema

Nguyen Dang Hai

Abstract: This topic focuses on building a movie ticket booking website system to effectively support the business operations of Blaze Cinema. At present, the demand for entertainment through watching movies is increasing, requiring cinemas to apply technology to improve customer experience and enhance management efficiency. The objective of the topic is to design and implement a ticket booking website system capable of displaying information about movie schedules, times, ticket prices, and accompanying services. The research method includes requirement analysis, user interface (UI) design, and web application development based on a modern platform. It is expected that the completion of this topic will contribute to improving the booking process and enhancing the service quality of Blaze Cinema.

Keywords: Blaze Cinema ticket booking website, ticket booking management system
