

Build a sales website for KuBiin Shop using the Laravel Framework

La Thanh Hanh

Abstract: This topic focuses on building a professional sales website for KuBiin Shop using the Laravel framework, a popular and modern PHP programming tool. The context of the topic stems from the need to enhance customer experience through an intuitive interface and an efficient website management system. The project's objective is to build a powerful e-commerce platform with easy-to-use sales, payment, and administration functions. The research method combines experimentation and application deployment to ensure the system's flexibility and reliability. The expected outcome of this topic is an effective sales website suitable for KuBiin Shop's business needs and contributing to the field of e-commerce website development.

Keywords: E-commerce website, Laravel, online business management
