

Build a sales website for the Hoàn Tuyết store in Thái Nguyên.

Ma Van Hoang

Abstract: This project aims to build an online sales website system for the Hoàn Tuyết store in Thái Nguyên, meeting the demand for modernizing commercial transactions. Through theoretical research on web design and development, while applying practical programming methods, we will address the problem of improving the store's business efficiency and customer experience. The expected results will bring convenience and enhance competitiveness in the local retail market.
