

Building a luxury watch e-commerce website.

Do Nhu Nhat

Abstract: This topic focuses on building a professional website to provide online Luxury Watch Shopping services. In the current context, the demand for e-commerce is growing strongly, and luxury watches represent a segment with significant potential. The objective of the topic is to address the problem of building a user-friendly website interface with high security and integrating advanced technologies in product management. The research method combines web design theory with practical application deployment to create a system that meets the business requirements of Luxury Watch Shopping. Through this, the topic aims to contribute to the development of the e-commerce industry and provide useful solutions for businesses in this field.

Keywords: Website design, E-commerce, Luxury watches
