

Build an online food ordering application for Dương Ngọc restaurant on the Android platform.

Nguyen Trong Tai

Abstract: This topic aims to research and design a mobile application system for online food ordering specifically for Duong Ngoc Restaurant. In the current context, with the strong development of information technology, applying technology to the food service industry has become an inevitable trend. The objective of the research is to improve user experience and enhance the restaurant's competitiveness in the modern market by providing an intuitive and easy-to-use interface through an Android application. The approach includes requirements analysis, system design, and application deployment. The expected results will open new opportunities for the restaurant to reach a wider customer base and improve business performance.
