

Build a technology sales website for King Tech store in Ninh Binh.

Ngo Thi Yen

Abstract: This project aims to build a professional e-commerce website for the King Tech store in Ninh Binh, meeting the needs of online business development. Through theoretical and experimental research, the objective of the project is to design and deploy an e-commerce system with a modern interface and effective administrative functions. The method combines frontend and backend technologies to build a website integrated with online payment features. It is expected that the implementation of the project will bring significant technical and economic benefits to King Tech, contributing to the promotion of e-commerce development in the local area.
