

Building a food delivery application in Dien Bien on the Android platform.

Dang Quang Sang

Abstract: In the context of increasing demand for online shopping, this topic focuses on building an Android application specializing in food sales in Dien Bien Phu city. Through theoretical and experimental research, the project aims to create an optimal technical solution to meet users' needs for fast and convenient ordering. The approach includes market analysis, user interface design, application development, and practical testing to ensure stable functionality and ease of use. It is expected that the project's results will not only create a new technological solution but also contribute to promoting the digital economy in Dien Bien.
