

Application of information technology in the management of personnel records at the People's Committee of Vinh Son Commune, Song Cong City, Thai Nguyen Province

Duong Thi Thu Huong

Abstract: In the current context, applying information technology (IT) to personnel record management is an urgent requirement. This study aims to build a personnel record management system at the People's Committee of Vinh Son Commune, Song Cong City, Thai Nguyen Province. The research methodology includes analyzing the current situation and proposing technical solutions based on advanced IT technologies. The expected results are to improve information management efficiency, enhance service quality for personnel, and contribute to the modernization of local administration.
