

Microsoft Excel software application to improve the efficiency of birth registration management at the People's Committee of Lam Ca Commune, Dinh Lap District, Lang Son Province.

Chu Thi Dung

Abstract: In the context of increasing demand for population information management, this study focuses on applying Microsoft Excel software to enhance the efficiency of birth registration management at the Lam Ca Commune People's Committee. The objective of the research is to build an electronic management system that helps minimize errors and improve document processing time. The research method includes a combination of analyzing the current situation and piloting the software in daily work. The expected outcome of this study is not only a technical solution but also a useful tool to support local population management activities.
