

Building a management program for equipment at the People's Committee of Thong Nguyen Commune, Hoang Su Phi District, Ha Giang Province

Trieu Mui Khe

Abstract: This topic proposes a solution to build an equipment management program for Commune-level Administrative Agencies, aiming to meet the need for optimizing usage efficiency and enhancing management control. Through theoretical research and experimentation at the People's Committee of Thong Nguyen Commune, Hoang Su Phi District, Ha Giang Province, we have identified specific requirements and designed a system suitable for practical conditions. The expected results will bring significant effectiveness in improving work productivity and asset management.
