

Building a work schedule management program at Hadanbi Vina Co., Ltd. in Thai Nguyen province

Luu Thi Hoa

Abstract: In the current context, effective work schedule management is an urgent requirement for businesses to enhance productivity and optimize resources. This topic aims to build a work schedule management system for Hadanbi Vina Co., Ltd. in Thai Nguyen province, through theoretical research on human resource management combined with practical implementation of information technology applications. The approach combines requirement analysis with the design of a user-friendly interface and system. Expected results will be an optimized work schedule solution, contributing to improved labor management efficiency in the enterprise.
