

Application of information technology in civil status management at Pha Long Commune People's Committee, Muong Khuong District, Lao Cai Province

Thào Seo Cu

Abstract: In the current context, the application of information technology (IT) to civil status management at the People's Committee of Pha Long commune, Muong Khuong district, Lao Cai province aims to address issues such as reducing workload, improving management efficiency, and ensuring personal data security. This study focuses on developing a digital civil status management system, combining theoretical research with experimentation to evaluate the feasibility and application of IT in this field. The expected results will contribute to modernizing local administrative work and improving the quality of public services for citizens.
