

Computerizing the management of records for poor and near-poor households at the People's Committee of Nam Tien Commune, Pho Yen Town, Thai Nguyen Province

Pham Thi Hoa

Abstract: In the current context, managing records of poor and near-poor households at the Nam Tien Commune People's Committee faces many difficulties in terms of efficiency and timeliness. This topic aims to research and implement a computerized system to solve this problem. Through a design process combining theoretical research with experimentation, the topic hopes to contribute to improving the quality of social information management at the local level. The expected results will bring positive impacts on the performance and accuracy of statistical data in supporting policies for poor and near-poor households.
