

Application of Microsoft Excel in room management at Flamingo Đại Lải Hotel - Vĩnh Phúc.

Nguyen Thi Bich Dieu

Abstract: In the context of the rapid development of the tourism industry, optimizing room management processes is an urgent issue for hotels. This topic aims to improve management efficiency through the application of Microsoft Excel to optimize the booking system and room allocation at Flamingo Đại Lải Hotel - Vĩnh Phúc. Through empirical research, the topic combines an assessment of the current state of room management with the deployment of advanced management tools from Excel. The expected result is to build an effective solution that can be widely applied, contributing to enhancing the hotel's competitiveness in the tourism market.
