

Application of information technology in the management of personnel records at the People's Committee of Phan Dinh Phung Ward, Thai Nguyen City, Thai Nguyen Province

Dang Thi Huong Quynh

Abstract: In the modern context, the application of information technology (IT) to the management of personnel records has become an inevitable trend to improve administrative efficiency. This project aims to build a digital personnel record management system at the People's Committee of Phan Dinh Phung Ward, Thai Nguyen City. Through a process of theoretical research combined with practical application deployment, the project will provide appropriate technical solutions to modernize the management of personnel information. The expected results of this project not only contribute to enhancing the management capacity of the Ward People's Committee but also hold significant importance in promoting IT application in the field of public administration in Vietnam.
