

Application of information technology in civil status management at Hoang Then Commune People's Committee, Phong Tho District, Lai Chau Province

Chang Xa Lan

Abstract: In the current context, the application of information technology (IT) to civil status management at the Hoàng Thân Commune People's Committee has become an urgent issue to improve the efficiency and quality of administrative services. The research aims to build an electronic civil status management system, addressing the problems of organizing, storing, and retrieving information quickly and securely. Through a combination of theoretical research and experimental methods, the study seeks to provide a technical solution to optimize the civil status management process. The expected results will bring significant efficiency to local population management.
