

Design of a 2020 calendar on Vietnamese cuisine

Nguyen Thi Thu Huyen

Abstract: This topic aims to design a practical Vietnamese lunar calendar for the year 2020, meeting the needs of research and application in various fields such as musicology and linguistics. The objective of the topic is to build a system for classifying and representing information about sounds in general and specific tonal words in Vietnamese in a scientific manner. By combining theory and experimentation, the topic aims to provide useful solutions for the future development of the field of acoustics, contributing to improving the quality of research and teaching of the Vietnamese language.

Keywords: Real lunar calendar, Acoustics, Phonetics, Sound classification, Vietnamese
