

Build a website to introduce and rent trucks for moving services for ATZ Hanoi Company.

Nguyen The Giang

Abstract: This topic aims to research and deploy a professional web system to introduce and provide truck rental services, in order to support ATZ Hanoi Company in improving management efficiency and customer service. Through the process of analyzing actual requirements, the topic combines theoretical research methods with application deployment to build a user-friendly interface and comprehensive information management functions. It is expected that the system will bring significant efficiency in optimizing the moving process, while enhancing the reputation and service quality of ATZ Company.

Keywords: website, truck, rental, moving, management
