Building a backup network system with security policy application for XSPACE MEDIA Joint Stock Company.

Nguyen Van Ha

Abstract: In the context of increasing cyberattack risks, this topic focuses on building a backup network system combined with security policies to ensure the stability and safety of the network of XSPACE MEDIA Joint Stock Company. Through theoretical and experimental research, the goal is to create an effective solution to prevent attacks and minimize risks. This topic not only contributes to the digital information industry but also brings practical value in protecting the company's important data.

Keywords: Redundant network system, Security policy, XSPACE MEDIA Joint Stock Company, Theoretical and experimental research
