

# **Build a sales website for Hoa Shop - Thai Nguyen using Laravel Framework**

**Tran Le Trung Hieu**

**Abstract:** In practice, managing and developing online business has become important for traditional stores like Hoa Shop in Thai Nguyen. This topic focuses on building a sales website system based on the Laravel framework to provide a comprehensive technical solution for the flower shop. The objective of the topic is to design and deploy an intuitive, easy-to-use web platform with the ability to manage orders, products, and shopping transactions. The research process will combine theory on web development with experimentation in the Laravel environment to build the system. The expected result is to provide an effective technical solution for Hoa Shop, while contributing to the field of online business and students' programming skills.

**Keywords:** Laravel Framework, e-commerce website, flower shop, web development, online business management
