

Building a backup network system and security in VYVY Company Limited.

Trieu Van Hung

Abstract: In the context of increasingly growing cybersecurity threats, building and deploying a backup and security network system at VYVY Company Limited has become extremely important. This topic focuses on the goal of designing and developing a comprehensive solution to ensure operational continuity and protect corporate information from cyberattacks. The research method is based on combining cybersecurity theory with experimentation to create an adaptable and flexible system. The expected results of the topic not only demonstrate high practical applicability but also make an important contribution to the overall development of the information technology industry.

Keywords: cybersecurity, backup system, VYVY Company Limited
