

Building a management program for the Literature and Poetry Club members.

Mai Duy Manh

Abstract: This topic focuses on designing and implementing a membership management system for the Van Tho Club. The main objective is to optimize the process of managing personal information, transactions, and activities of the club's members. Through practical research, the topic identifies current needs as well as challenges to be addressed. Using a combined method of analyzing requirements from practice and designing a system based on modern information management technology, we have built a solution suitable for the club's operational scale. The expected result is to provide the club with an effective tool to enhance service quality and improve the experience for its members.
