

Build a sales website for Exchange Language Coffee Shop - Thai Nguyen using Laravel Framework

Nguyen Cong Minh

Abstract: This topic aims to research and deploy an e-commerce web system for the Exchange Language coffee shop in Thai Nguyen, with the goal of optimizing product management processes, enhancing user experience, and boosting revenue. By integrating the Laravel Framework, the project will apply a combined method of theoretical and experimental research to ensure system stability and high performance. The expected outcome of the project is not only a suitable technical solution but also a contribution to the application of digital technology in local coffee business management.

Keywords: Laravel Framework, e-commerce, coffee shop, product management, sales website
