

Building a room rental management system for Dat Phong - Quyet Thang Thai Nguyen

Nguyen Thi Trang

Abstract: In the context of the rapidly developing real estate market, the issue of effectively managing student apartments is becoming urgent. This project aims to build a management system for Dat Phong - Quyet Thang Thai Nguyen boarding houses with the goal of optimizing operational processes and improving customer service quality. The research methodology includes analyzing specific requirements, designing user interfaces, and conducting system testing. The expected results will bring better work efficiency for boarding house owners and improve the experience of student tenants.
