Abstract: This topic aims to explore and build a project management system for small and medium-sized enterprises to enhance management efficiency. The practical context increasingly demands that businesses have an advanced and more flexible management system. The research method combines current situation analysis, system model design, and experimental application deployment. The expected results will provide businesses with useful solutions in the project management process, contributing to the development of the information technology industry.

Keywords: Project management system, Small and medium enterprises, Empirical research, Application deployment
