

Building a news website for Minh Ha High School

Nguyen Thi Phuong Thao

Abstract: In the modern context, building a news website is necessary to provide fast and effective information for students, teachers, and parents of Minh Ha High School. The objective of this project is to develop a website system to organize and manage news article information professionally. The research method combines experimental application deployment and theoretical study of website design. The project is expected to bring significant benefits in improving the school's communication efficiency and contributing to the promotion of sustainable development in education.
