

Build an English learning website for children

Doan Van Dai

Abstract: In the current context, accessing a second language such as English has become more important than ever for the comprehensive development of children. This topic focuses on building an English learning website specifically for children to meet the need for self-directed and effective learning through digital means. The objective of the research is to design and implement an interactive, user-friendly web system that helps children practice listening, speaking, reading, and writing while developing logical thinking skills. The research method combines theoretical analysis of educational science with experimental website development. The expected results will contribute significantly to improving children's learning effectiveness through digital technology.
