

Building a monitoring program for the wastewater treatment system of Vietnam Pharmaceutical Joint Stock Company

Tran Huu Duong

Abstract: This topic aims to research and deploy an automatic monitoring system for the wastewater treatment process at Vietnam Pharmaceutical Joint Stock Company. In the context of increasingly stringent environmental management, improving the quality of wastewater treatment has become more necessary than ever. Through theoretical and experimental research, the topic aims to build an effective monitoring system that helps ensure compliance with regulations and minimize operating costs. The expected results from the topic will not only improve the quality of wastewater treatment services but also contribute to the development of technology in this field in Vietnam.
