

Creating a 2D video "Life and Behavior of Kangaroos"

Nguyen Thi Trang

Abstract: This topic aims to research and create a detailed 2D video about the life and behavior of kangaroos, meeting educational and entertainment needs. Through the experimental process, the topic combines theoretical methods with practice to collect and analyze information from reliable sources. The expected results will provide an overview of the behavior and habitat of kangaroos, while serving as a useful educational tool for the academic community and the public.
