

Research on the operation, maintenance, and troubleshooting procedures for the Elight m90e aesthetic machine.

Le Minh Cong

Abstract: This topic aims to analyze the practical context of operating and maintaining the E-light M90E aesthetic equipment, identifying common issues encountered during use. Thereby, it studies troubleshooting methods and improves the machine's working performance. The approach is based on combining theory with experimentation to enhance the operation and maintenance skills of medical staff. The significance of the topic lies in its ability to provide practical application solutions, helping to minimize risks and increase efficiency in the use of aesthetic machines.

Keywords: Aesthetic device, E-light M90E, maintenance, troubleshooting
