

Research on the operation and maintenance process of the C-PLUS aesthetic machine.

Cao Văn Linh

Abstract: In the context of the increasing demand for aesthetic devices in medical facilities, researching the operation and maintenance procedures of the C-PLUS aesthetic machine to ensure service quality and user safety is necessary. The objective of this topic is to build an effective management system to optimize the operation and maintenance processes of these devices. The research method includes collecting real-world data, analyzing modern technology combined with assessing the actual situation at medical facilities. It is expected that this topic will significantly contribute to improving service quality and data security in the aesthetic industry.

Keywords: Aesthetic equipment, operating procedures, C-PLUS machine maintenance, effective management, medical safety
