

Research on the installation process of medical gas systems

Nguyen Khanh Linh

Abstract: This topic aims to review and develop an effective installation process for medical gas systems, meeting the high safety requirements in healthcare facilities. Through theoretical research combined with experimentation, the topic identifies the necessary steps to deploy this system safely and efficiently. The expected results will provide detailed guidance for the installation of medical gas systems, making a significant contribution to improving the quality of healthcare services.

Keywords: Medical gas system, installation procedure, medical facility, safety, experiment
